Karim Mohamed

UI/UX DESIGNER & WORDPRESS DEVELOPER

ABOUT ME!

Hey, This is **karim Mohamed**. From alexandria, Egypt. When I began my career in the web development industry back in 2005, the game was a different one. You just needed HTML, CSS, a little of JavaScript and PHP, nothing else. But as it happens with everything else things change. In 2009 I was learning more about PHP, CSS and JavaScript. I developed a lot of websites, customs CMS's and one e-commerce from scratch. After that I found Wordpress is the best way to create beautiful websites i work with it and became a WordPress developer. I design WordPress themes and develop plugins for WordPress.
